FIELD OF THE INVENTION

The present invention relates to propylene polymer compositions each comprising two kinds of propylene polymers and to propylene polymer compositions each comprising a propylene polymer and other olefin (co) polymer.

BACKGROUND OF THE INVENTION

Propylene polymers have been conventionally molded by various molding methods and the molded articles are applied to extensive uses.

20 The propylene polymers are generally prepared using a catalyst comprising a transition metal compound and an organoaluminum compound, i.e., so-called Ziegler catalyst.
